Circulation width	Yes	All doors are wider than 80 cm.
Guide dogs	Yes	Authorized.

Accessibility and PRM facilities at Amazone vzw

Amazone strives to provide an accessible and inclusive environment for everyone. We have implemented several measures to improve the accessibility of our buildings for people with limited mobility. Below you will find more information about the available measures:

Access to the floors and the restaurant

All our spaces are accessible for people with reduced mobility. Ramps can be installed on the ground floor upon request. The upper floors are accessible via a technical elevator. The main elevator will be available again from 2026 for even easier access.

Garden and exterior

Our garden and outdoor areas are also accessible to people with reduced mobility and offer a pleasant and adapted environment.

Toilets for people with reduced mobility

Accessible restrooms are available upon request. Please contact reception for ramp installation.

Public transport

Amazone benefits from excellent public transport connections, facilitating access for people with reduced mobility:

Tram: stop “Kruidtuin”, 350 m away, accessible for people with reduced mobility.

Metro: “Kruidtuin” station (lines 2 and 6) 500 m away with lift for people with reduced mobility

Bus: Several bus lines with accessible stops nearby.

Access from the street

Thanks to lowered sidewalks and wheelchair-accessible paving stones, the site is easily accessible from the street.

Drop off and parking

There is currently no drop-off or designated parking on the premises. The garage is located at Uniestraat 3, but there is no elevator from the garage; currently, there is only a staircase to the ground floor.

Door width

All our doors are wider than 80 cm, allowing wheelchairs and other aids to pass through with ease.

Guide dogs

Guide dogs are welcome on our premises.

We strive to create an accessible environment for everyone. Feel free to contact us for more information or specific requests.
